

# Leveraging Digital Health Tools to Advance Health Equity

# TENNESSEE

To address gaps in technology adoption that impact underserved communities, the National Center for Primary Care (NCPC) at Morehouse School of Medicine is examining the adoption and use of digital health tools by primary care clinicians in four southeastern states: Georgia, Kentucky, North Carolina, and Tennessee.

## Digital health tools (DHT) include:

## Tennessee Demographics

**Total Population: 7 million+**

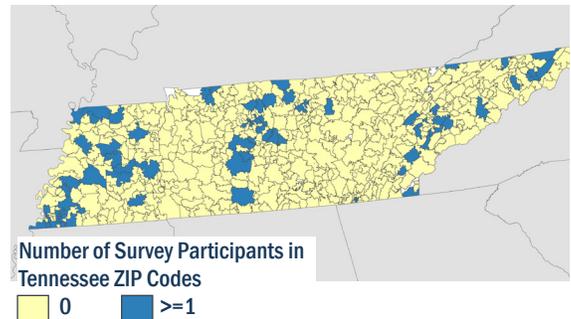

2% Asian | 17% Black | 3% Other | 78% White

Hispanic Ethnicity

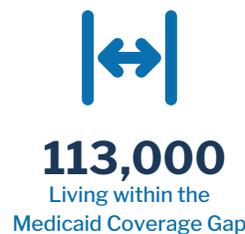

Live in Rural Area

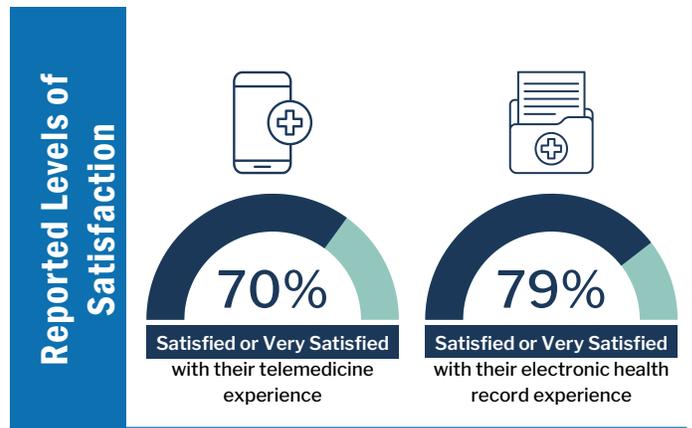

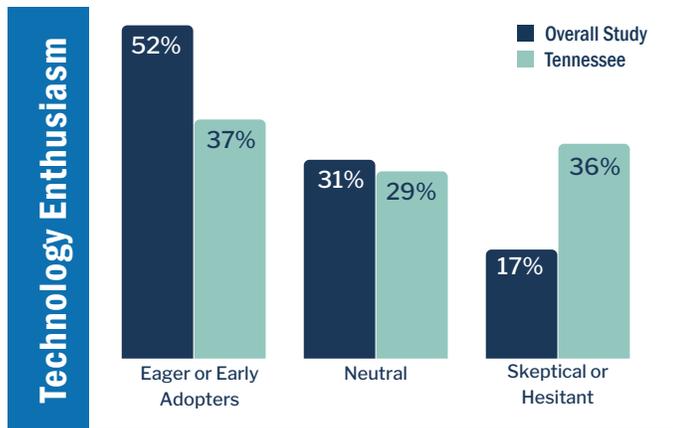

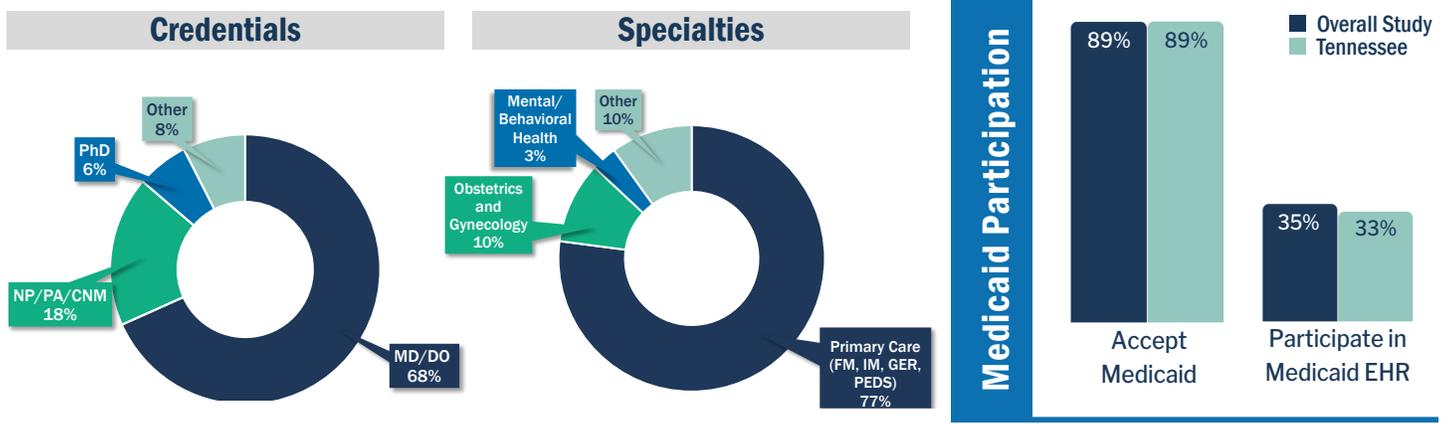

More than 160 clinicians in Tennessee have completed the survey, highlighting the challenges and opportunities they have experienced using digital health tools.

## Social Determinants of Health in Tennessee

# Survey Participants Demographics

The majority of the 161 clinicians from Tennessee who participated in the survey held MD or DO credentials, specialized in primary care, and practiced in urban areas. They reported being satisfied with existing DHT.

# Current Digital Health Tool Use

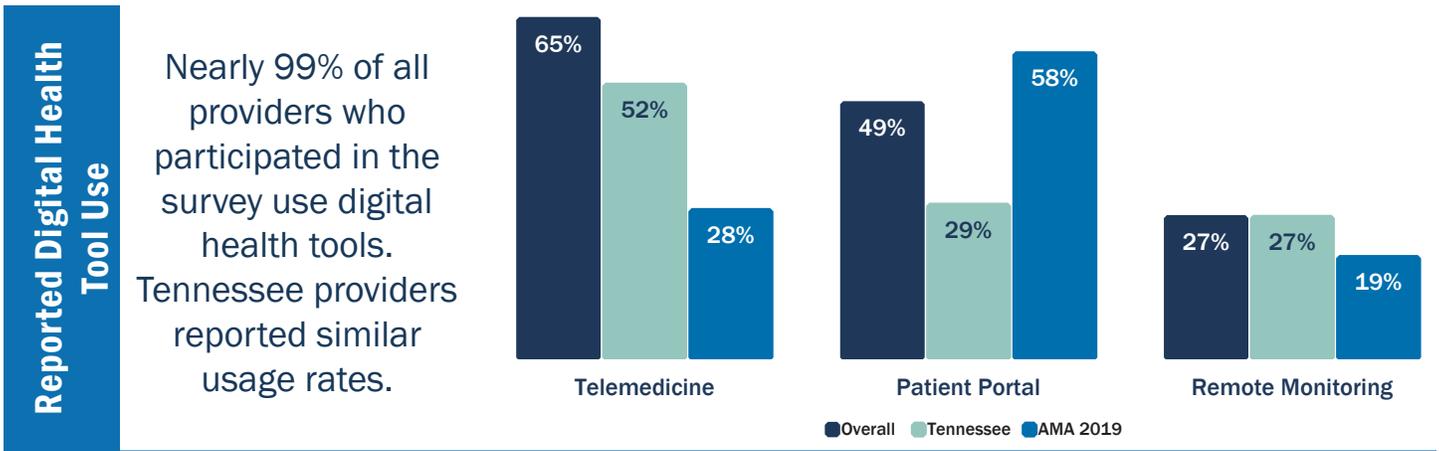

90.7% of respondents were connected to the State HIE

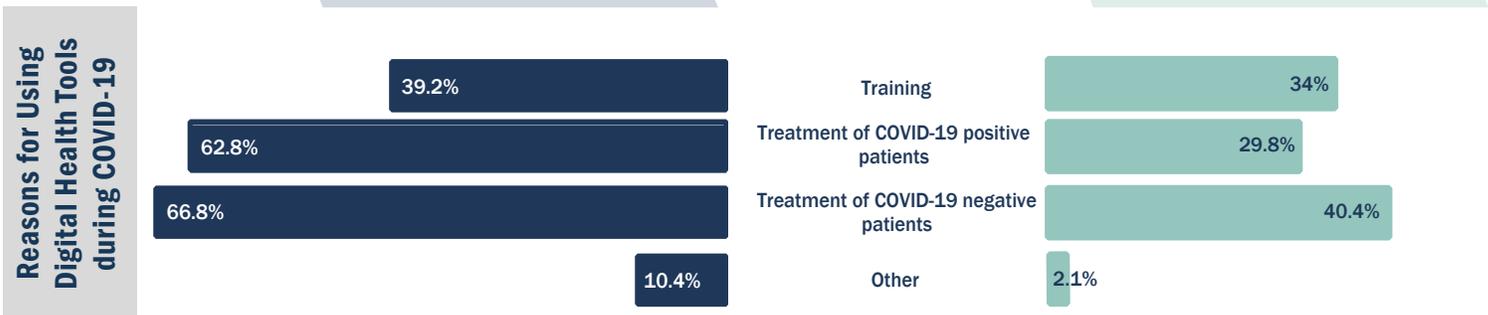

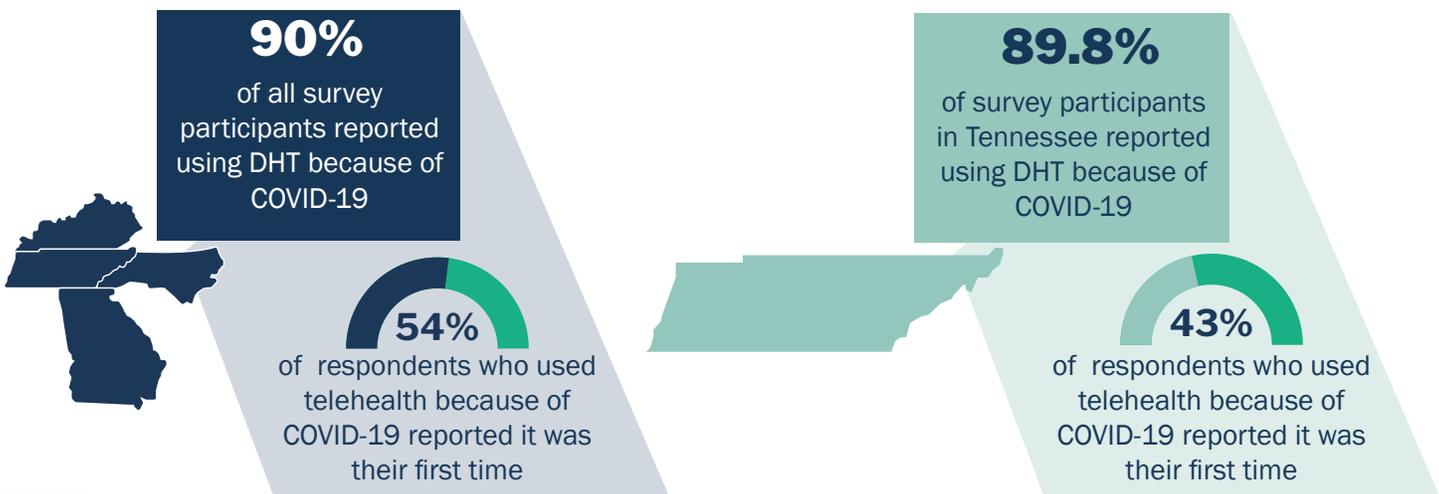

47% of respondents were using the State HIE

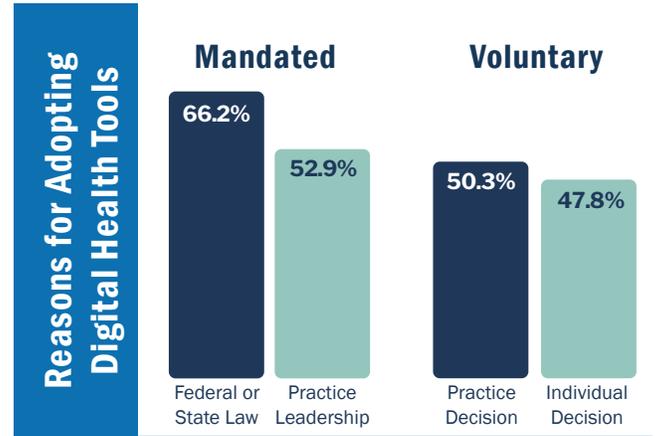

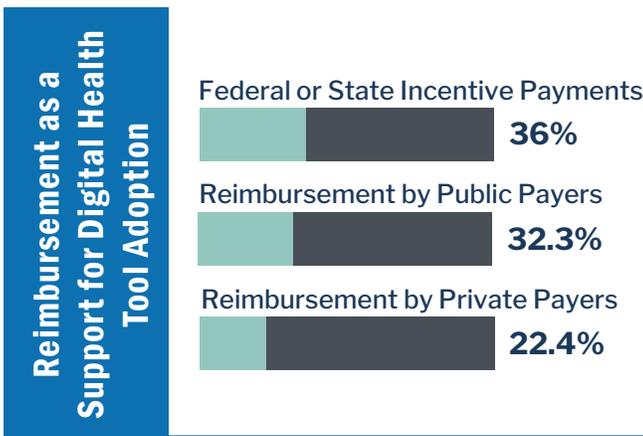

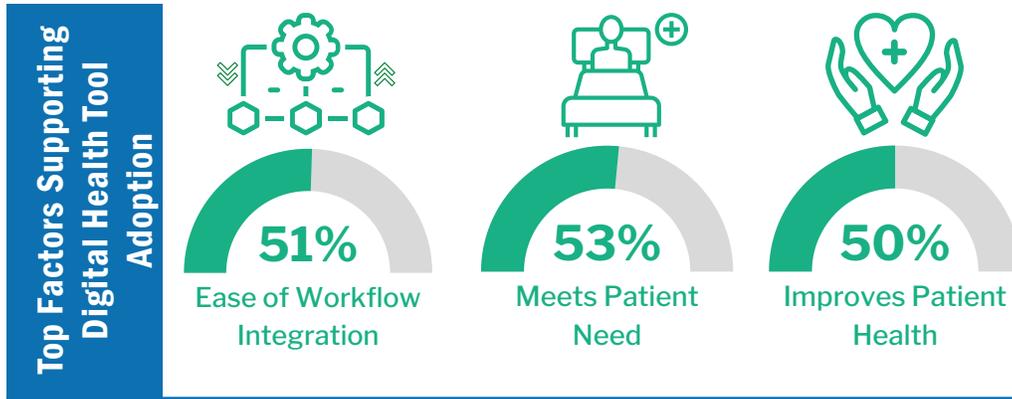

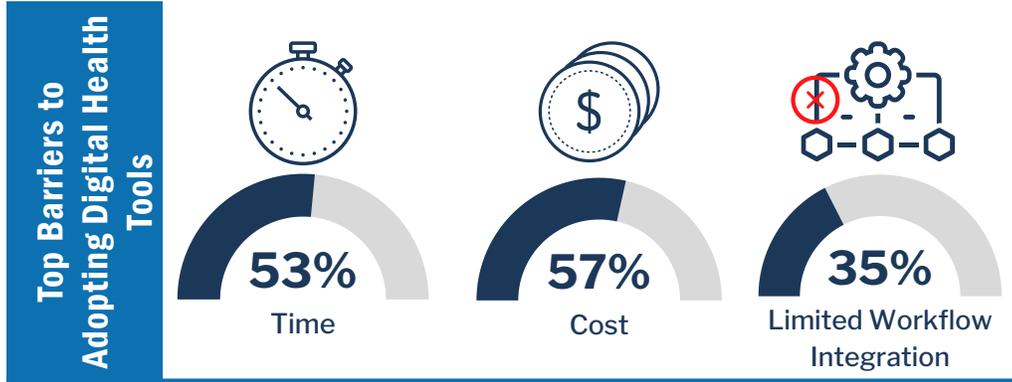

**More than 9 in 10 providers reported being connected to the Health Information Exchange (HIE), but less than half reported using it.**

## Digital Health Tool Use and COVID-19

# Factors that Support and Impede Digital Health Tool Adoption

## Reasons for Digital Health Tool Use after COVID-19
